-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 09 February 2004 have been fully considered but they are not persuasive. With respect to the argument that the entanglement of hair is not taught or an important function please see Dyrud et al. col. 1, lines 26-29. With respect to the argument that neither reference teaches measuring respiration and metabolism; the claims do not claim nor have any structural limitations for measuring respiration or metabolism. With respect to the argument that the mask is not an oxygen mask; the means for holding a mask to a person face can be used with any type of mask. Furthermore, no structural limitations have been made for an oxygen mask, therefore any mask capable of allowing a person to breath oxygen can be considered an oxygen mask. And furthermore, no patenable weight is given to limitations in the preamble.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolph 5265595 in view of Dyrud et al. 5819731.

4. Rudolph teaches a mask having an improved means for being secured over the nose and the mouth of a patient, the improvement comprising: a pair of elastic bands

Art Unit: 3761

(col. 7; lines 28-29), both ends of the each pair affixed at points of attachment 12 to each of both sides of the mask (fig. 1), adjustably securable to the patient by pulling the ends anteriorly through the points of attachment (col. 7; lines 18-29), and wherein the elastic bands are affixed at four separate points on the mask (fig. 4). It should be noted that Rudolph fails to teach wherein the bands are extendible to loop over and around each ear of the patient.

5. Dyrud et al. teaches a mask with common strap for looping around the ear of patient for securing a mask. Therefore it would have been obvious to one of ordinary skill in the art to modify the mask of Rudolph to include the strap of Dyrud et al. to prevent entanglement of the wearer's hair or otherwise ruin the wearer's hair style (col. 1, lines 26-29).

6. As to claim 3, 7, and 10, Rudolph/Dyrud teach wherein the elastic bands are affixed at two separate points on the mask (34 or 36).

7. The recitation "an oxygen mask" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). The device of Rudolph/Dyrud is fully capable of performing the claimed limitations, because the invention is directed towards means for securing.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
